

## PRISON TORTURE DISCLOSED

By Khalil

On August 22, 2015, approximately a day after my very first message on PRISON RADIO exposing the untold truth concerning the riot here at SCI HOUTZDALE; I was denied access to the telephone and falsely accused of refusing to lock in my cell. Henceforth, while being secured in my single cell, a aggressive "goon squad" equipped with riot gear-like body armor approached my cell. Six of them with a Lt. and medical personnel threatening to apply force to extract me from the cell utilizing a shield, pepper spray, and a stun gun. I complied to the order of handcuffing me through the feeding slot on the door. After being restrained in handcuffs, I was maliciously ushered off to the strip search cage to determine whether I had any contraband on my possession. Thereafter, they placed me in a standard jumpsuit and assigned to a unsanitary, humid, plexiglass with metal gates over it Hannibal Lector type of cell. The whole process from one cell to the other was recorded on a handheld institutional camera. A few hours later, I suffered a asthma attack from the humidity in the cell and negated medical attention by the 10 to 6 shift guards for several hours causing me excruciating pain, which led to allucinations, panic, depression, and fear of my possible demise. Further, I was ignored in the cell for seventeen days. Half of those days were without basic or personal property, shower, and recreation. This over exaggerated misuse of administrative power is a violation of my human rights. Such is a daily occurrence world-wide. For any concerns, comments, or questions contact:
